**Clinic Description**

The Gynaecology Service at Western Health offers:

- General gynaecology
- Triaging and referral to RWH of gynaecological oncology (pending a replacement for gynaecology oncology subspecialist)
- Colposcopy and management and cervical dysplasia
- Urogynaecology, Continence, Urodynamics and Advanced Pelvic Floor Physiotherapy
- Endoscopic gynaecology unit with colorectal collaboration – includes complex endometriosis management
- Fertility and contraception
- OASIS follow-up (gynaecologist and physiotherapist)

**Inclusion criteria**

Referrals to the Western Health Gynaecology Service must include:

- a detailed history
- examination
- relevant investigations as per the minimum investigation list

**Exclusion criteria**

Please refer to the document “Western Health Gynaecology referral Guidelines” for details regarding those conditions that either do not require specialist referral, or are not offered by the Western Health Gynaecology Service.

**Minimum investigation/clinical information required for triage**

Click here for the list of minimum investigations for Gynaecology Referrals.

Please note:

Referrals that do not contain the minimum investigations outlined above will be returned with a request for more information.

Referrals that are:

1. Returned for additional information,
2. Rejected or
3. Triaged to routine with a suggested management plan will be copied to the patient to facilitate follow-up with the referring GP for further management.
