

 Victorian Healthcare Experience Survey

Sunbury Day Centre

June 2017

About the Victorian Healthcare Experience Survey

The Victorian Healthcare Experience Survey (VHES) is a state-wide survey of people's public healthcare experiences. The Ipsos Social Research Institute – an independent contractor - conducts the survey on behalf of the Victorian Department of Health and Human Services using questionnaires based on the internationally recognised work of the Picker Institute.

The VHES allows a wide range of people to provide feedback on their experiences and provides specialised questionnaires for:

- adult and child inpatients, including parents/guardians
- adult and child emergency department attendees, including parents/guardians
- maternity consumers
- adult and child specialist clinic attendees, including parents/guardians.
- adult community health clients
- adult ambulance service users (both planned and emergency)

The inpatient, emergency, maternity, specialist and ambulance questionnaires are distributed to a randomly selected group of eligible people from each health service in the month following the hospital discharge or the emergency department attendance. Community health questionnaires are distributed to clients while they use a community health service.

Inpatient, emergency and maternity surveys are conducted monthly, while specialist clinics, ambulance and community health surveys are conducted over a three monthly period once annually.

People are able to respond either online or by pen and paper with a freepost return.

Comprehensive quarterly survey results for individual health services are reported through this website. Health Services use these results to direct quality improvement activities.

For further information about the VHES please email: vhes@dhhs.vic.gov.au

If you are having technical difficulties with this portal, please view the [help](#) page, or contact results@vhes.com.au

This PDF was generated on 13 09 2017.

Answers to frequently asked questions and further information about the project's methodology are available in the appendix of this report.

Sunbury Day Centre

Sunbury Day Centre is a member of Western Health health service (WES) and is within the Other Metro peer group (OTH).

The Other Metro peer group consists of the following campuses

Angliss Hospital

Sandringham Hospital

Healesville & District Hospital

Yarra Ranges Health

Werribee Mercy Hospital

Broadmeadows Health Service

Craigieburn Health Service

Rosebud Hospital

Moorabbin Hospital

Casey Hospital

Cranbourne Integrated Care Service

Williamstown Hospital

Sunbury Day Centre

Response rates and overall experience

Adult Inpatient - April 2017 - June 2017

Overall Experience and Key Aspects of Care

The VHES Adult inpatient questionnaire seeks to discover the experience of people, 16 and over, who have been admitted to one of 116 Victorian public hospitals. Potential respondents are randomly selected from people who were discharged from the health service in the preceding month.

This section features the overall experience question, and the five key aspects of care that were most likely to differentiate a positive overall experience from a negative overall experience for the adult inpatient category.

In order to better understand the factors influencing patients' overall experiences in Victorian public hospitals, we asked a range of people to tell the story of their recent healthcare experiences. Videos about care and compassion, information and communication and confidence and trust can be viewed below.

🌱 76. Overall, how would you rate the care you received while in hospital? [View data](#)

Answers

VG - Very good **G** - Good **A** - Adequate **P** - Poor **VP** - Very poor

★ 12. In your opinion, how clean was the hospital room or ward that you were in? [View data](#)

Answers

VC - Very clean **FC** - Fairly clean **NV** - Not very clean **NA** - Not at all clean

★ 25. Did you have confidence and trust in the nurses treating you? [View data](#)

Answers

YA - Yes, always **YS** - Yes, sometimes **N** - No

★ 33. How often did the doctors, nurses and other healthcare professionals caring for you explain things in a way you could understand? [View data](#)

Answers

AO - All of the time **MO** - Most of the time **SO** - Some of the time **R** - Rarely **N** - Never

Adult Inpatient - April 2017 - June 2017

Spotlight

Transitions index adult inpatient

The transitions index has been developed with the aim of improving processes relating to discharge planning. It incorporates the average of the positive scores for four adult inpatient questions relating to discharge. The index provides an overview of how hospitals, health services, peer groups and the state are performing in the discharge process.

The transitions index is shown below followed by the four questions that contribute to the index.

n represents the average n across questions within the Spotlight. [View data »](#)

★ 69. Before you left hospital, did the doctors and nurses give you sufficient information about managing your health and care at home? [View data](#)

Answers

YC - Yes, completely **YS** - Yes, somewhat **RI** - Received insufficient info **DR** - Didn't receive info

70. Did hospital staff take your family or home situation into account when planning your discharge? [View data](#)

Answers

YC - Yes, completely **YT** - Yes, to some extent **N** - No **NA** - Not applicable

Answers

YC - Yes, completely **YT** - Yes, to some extent **N** - No **ID** - I didn't need this

72. If follow up with your General Practitioner (GP) was required, was he or she given all the necessary information about the treatment or advice that you received while in hospital? [View data](#)

Answers

Y - Yes **N** - No **NI** - No info was needed **FU** - Follow up wasn't required

Adult Inpatient - April 2017 - June 2017

Admission To Hospital

Patients were asked whether their hospital stay was planned in advance or an emergency.

1. Was this hospital stay planned in advance or an emergency?

Answers

PI - Planned in advance **E** - Emergency **SE** - Something else

Adult Inpatient - April 2017 - June 2017

The Emergency Department

In this section, patients who arrived at hospital via the Emergency Department were asked to rate the politeness and courtesy of staff and the care and treatment they received from the doctors and nurses in the ED.

2. How would you rate the politeness and courtesy of staff in the ED? [View data](#)

Answers

VG - Very good **G** - Good **NG** - Neither good nor poor **P** - Poor **VP** - Very poor **DK** - Don't know

3. Do you think the amount of time you spent in the ED was...? [View data](#)

Answers

AR - About right **ST** - Slightly too long **MT** - Much too long

4. Overall, how would you rate the care and treatment you received from your doctors in the ED? [View data](#)

Answers

VG - Very good **G** - Good **NG** - Neither good nor poor **P** - Poor **VP** - Very poor

5. Overall, how would you rate the care and treatment you received from your nurses in the ED? [View data](#)

Answers

VG - Very good **G** - Good **NG** - Neither good nor poor **P** - Poor **VP** - Very poor

Adult Inpatient - April 2017 - June 2017

Waiting List Or Planned Admission

Those whose hospital stay was planned in advance were asked how they felt about the length of time they were on the waiting list before their admission to hospital and whether they received sufficient information about their hospital stay before their arrival.

6. How do you feel about the length of time you were on the waiting list before your admission to hospital? [View data](#)

Answers

A - Appropriate **AB** - A bit too long **MT** - Much too long

7. Before your arrival, did you receive sufficient information about your hospital stay? [View data](#)

Answers

YC - Yes, completely **YS** - Yes, somewhat **RI** - Received insufficient info **DR** - Didn't receive info

Adult Inpatient - April 2017 - June 2017

All Types Of Admission

8. Do you think the time you had to wait from arrival at hospital until you were taken to your room or ward was...? [View data](#)

Answers

AR - About right **ST** - Slightly too long **MT** - Much too long

9. How would you rate the politeness and courtesy of admissions staff? [View data](#)

Answers

VG - Very good **G** - Good **NG** - Neither good nor poor **P** - Poor **VP** - Very poor

Adult Inpatient - April 2017 - June 2017

The Hospital & Ward

This section explored the physical environment of the hospital and ward. Patients were asked about the cleanliness of their ward and the toilets and whether hand-wash gels were available for patients and visitors. They were also asked if they shared a room with a patient of the opposite sex.

10. During your hospital stay, did you share a room with a patient of the opposite sex?

Answers

Y& - Yes & this was a concern **Y&** - Yes & this was not a concern **N** - No

11. During your hospital stay, were you ever bothered by any of the following? (Please select all that apply) [View data](#)

Answers

OP - Other patients' noise **HS** - Hospital staff noise **VN** - Visitors' noise **EN** - Equipment noise **ON** - Other noise **L** - Lighting **NO** - None of the above

★ 12. In your opinion, how clean was the hospital room or ward that you were in? [View data](#)

Answers

VC - Very clean **FC** - Fairly clean **NV** - Not very clean **NA** - Not at all clean

🌿 13. How clean were the toilets and bathrooms that you used in hospital? [View data](#)

Answers

VC - Very clean **FC** - Fairly clean **NV** - Not very clean **NA** - Not at all clean **NA** - Not applicable

14. Were hand-wash gels available for patients and visitors to use? [View data](#)

Answers

Y - Yes **TW** - They were empty **ID** - I did not see any **DK** - Don't know

15. Did you feel friends and family were welcome to visit you? [View data](#)

Answers

YA - Yes, always **YS** - Yes, sometimes **N** - No **NA** - Not applicable

Adult Inpatient - April 2017 - June 2017

Food

In this section, patients were asked whether the hospital food was suitable for their dietary needs and whether they received enough help from staff to eat their meals. Patients were also asked to rate the hospital food.

16. How would you rate the hospital food? [View data](#)

Answers

VG - Very good **G** - Good **NG** - Neither good nor poor **P** - Poor **VP** - Very poor **NA** - Not applicable

17. Was the hospital food suitable for your dietary needs (for example medical, cultural, or religious needs or personal preference)? [View data](#)

Answers

YA - Yes, always **YS** - Yes, sometimes **NN** - No, never **NA** - Not applicable

18. Did you get enough help from staff to eat your meals? [View data](#)

Answers

YA - Yes, always **YS** - Yes, sometimes **N** - No **NA** - Not applicable

Adult Inpatient - April 2017 - June 2017

Your Doctors

This section covers the care provided specifically by doctors. It includes whether the patient felt that the doctors treating them knew enough about their medical history and whether they had confidence and trust in these doctors. Patients were also asked about the doctors' compassion, and to rate the care they received from doctors overall.

19. During your hospital stay, did the doctors who treated you know enough about your medical history? [View data](#)

Answers

YA - Yes, always YS - Yes, sometimes N - No

20. Did you have confidence and trust in the doctors treating you? [View data](#)

Answers

YA - Yes, always YS - Yes, sometimes N - No

21. If you needed to talk to a doctor, did you get the opportunity to do so? [View data](#)

Answers

YA - Yes, always YS - Yes, sometimes N - No NA - Not applicable

22. Were the doctors treating you compassionate? [View data](#)

Answers

YA - Yes, always YS - Yes, sometimes N - No

23. Overall, how would you rate the care and treatment you received from your doctors? [View data](#)

Answers

Answers

VG - Very good **G** - Good **NG** - Neither good nor poor **P** - Poor **VP** - Very poor

Adult Inpatient - April 2017 - June 2017

Other Healthcare Professionals

In this section, patients were asked about the quality of care and treatment they received from health professionals other than doctors and nurses.

30. Which, if any, of the following other healthcare professionals did you receive care or treatment from during this hospital stay? (Please select all that apply)

Answers

D - Dietician **OT** - Occupational Therapist **P** - Pharmacist **P** - Physiotherapist **P** - Psychologist **R** - Radiographer **SW** - Social worker

SP - Speech Pathologist **O** - Other **N** - None

31. Overall, how would you rate the care and treatment you received from these other healthcare professionals? [View data](#)

Answers

VG - Very good **G** - Good **NG** - Neither good nor poor **P** - Poor **VP** - Very poor

Adult Inpatient - April 2017 - June 2017

Your Care

This section covers care provided by all health professionals to patients during their hospital stay. Patients were asked whether the staff treating and examining them introduced themselves and their role and how often doctors, nurses and other healthcare professionals explained things in a way the patient could understand. Questions also covered the behaviour of the hospital staff, including whether they talked about the patient as if they weren't there and whether they cleaned their hands or put on gloves before examining the patient. Patients were also asked how much information was given to them and their relatives about their condition and treatment and whether they received emotional support and assistance from hospital staff during their stay.

32. Did the staff treating and examining you introduce themselves and their role? [View data](#)

Answers

YA - Yes, all staff SS - Some staff VF - Very few / none

★ 33. How often did the doctors, nurses and other healthcare professionals caring for you explain things in a way you could understand? [View data](#)

Answers

AO - All of the time MO - Most of the time SO - Some of the time R - Rarely N - Never

34. While you were in hospital, did hospital staff talk about you as if you weren't there? [View data](#)

Answers

Answers

YA - Yes, always **YS** - Yes, sometimes **N** - No

79. Were you ever treated unfairly for any of the reasons below? (Please select all that apply) [View data](#)

Answers

YA - Your age **YS** - Your sex **YE** - Your ethnic background **YR** - Your religion **YS** - Your sexual orientation **AD** - A disability that you have **MS** - Marital status **SE** - Something else **IW** - I was not treated unfairly

Adult Inpatient - April 2017 - June 2017

About You

This section covers general demographic questions about the patient. These included year of birth, gender, main language spoken and Aboriginal/Torres Strait Islander status. Patients were also asked a number of questions about their health, including how often in the last twelve months they had been admitted as an inpatient and any long standing medical conditions they have.

80. What is your gender?

Answers

M - Male **F** - Female **T** - Transgender **O** - Other **NA** - Would prefer not to say

81. Average age of patient

The average age of the patient was

63

82. Which language do you mainly speak at home?

Answers

E - English **AL** - A language other than English

83. What is the highest level of education you have completed?

Answers

HN - Have not completed secondary school **CS** - Completed secondary school **TO** - Trade or technical certificate or diploma

UG - University graduate **PG** - Post graduate / higher degree

84. Are you of Aboriginal origin, Torres Strait Islander origin, or both?

Answers

YA - Yes, Aboriginal **YT** - Yes, Torres Strait Islander **YB** - Yes, both Aboriginal and Torres Strait Islander **N** - No

85. How many times in the last 12 months have you been admitted as an inpatient to this hospital?

Answers

TT - This time only **2T** - 2 times **3-** - 3 - 5 times **6O** - 6 or more times

86. Which, if any, of the following long-standing conditions do you have? (Please select all that apply)

Answers

AC - A chronic illness **AM** - A mobility impairment **DO** - Deafness or hearing impairment **BO** - Blindness or vision impairment
AM - A mental health condition **AL** - A learning disability **NO** - None of these

87. Thinking about the month leading up to your hospital stay, how many days did illness or injury keep you in bed for all or a substantial part of the day?

Answers

N - None **1D** - 1 day **2D** - 2 days **3D** - 3 days **4D** - 4 days **5T** - 5 to 7 days **8T** - 8 to 10 days **MT** - More than 10 days **DK** - Don't know

88. In general, how would you rate your health?

Answers

E - Excellent **VG** - Very good **G** - Good **F** - Fair **P** - Poor

89. Who completed this questionnaire?

Answers

ID - I did (the patient) **IR** - I received help from someone else **SE** - Someone else on my behalf

Adult Inpatient - April 2017 - June 2017

Other Comments

This section allowed the patients to suggest ways that they felt the hospital could improve their care and services and to list the best and worst things about their stay in the hospital.

90. What could the hospital do to improve the care and services it provides to better meet the needs of patients?

Answers

NT - Nothing **N** - None **I** - Incomprehensible **IN** - Staff numbers **IE** - Emotional / interpersonal care **IM** - Medical treatment **IH** - Handwashing
IP - Patient involvement in care **IM** - Follow-up or communication with GP **MA** - Length of stay **IP** - Patient safety **IP** - Privacy
PM - Provide more information **IC** - Communication between staff and family / friends / carers **IC** - Communication between staff and patient
IC - Communication / collaboration between staff members **RW** - Wait times (waiting list) **RW** - Wait times (ED) **RW** - Wait times (discharge)
RW - Wait times (other) **IC** - Cleanliness **IF** - Facilities **RN** - Reduce noise **IC** - Car parking **IR** - Room sharing protocol **IF** - Food quality
BM - Meeting dietary needs **IF** - Food quantity **O** - Other **U** - Unclear **GQ** - Staff quality

91. What were the best things about your stay in hospital?

Answers

NB - Nothing **N** - None **I** - Incomprehensible **E** - Everything **NW** - Wait times **EC** - Emotional / interpersonal care **QO** - Medical treatment
MO - Medical outcome **PI** - Patient involvement in care **AC** - A chance to rest / recover **GC** - Communication between staff and patient
GC - Communication between staff and family / friends / carers **GC** - Communication / collaboration between staff members
QO - Information quality **F-** - Facilities - general **PR** - Private rooms / good room sharing **QE** - Quiet / relaxed environment **SA** - Social aspect
F - Food **O** - Other **U** - Unclear **GQ** - Staff quality

92. What were the worst things about your stay in hospital?

Answers

N - None **NW** - Nothing **I** - Incomprehensible **BU** - Being unwell / in hospital **PM** - Medical treatment **IL** - Length of stay
PF - Follow-up or communication with GP **PE** - Emotional / interpersonal care **LO** - Lack of patient involvement in care **NE** - Not enough staff
PH - Poor handwashing **FU** - Felt unsafe **LO** - Lack of privacy **PC** - communication between staff and family / friends / carers
PC - Communication between staff and patient **PC** - Communication / collaboration between staff members **II** - Insufficient information
WT - Wait times (ED) **WT** - Wait times (discharge) **WT** - Wait times (other) **RS** - Room sharing **N** - Noise **UW** - Unclean ward / bathrooms
PF - Facilities **PC** - Car-parking **FQ** - Food quality **FQ** - Food quantity **FD** - Food did not meet dietary needs **O** - Other **U** - Unclear
GQ - Staff quality **WT** - Wait times (waiting list)

The VHES asks consumers to provide in-depth feedback about a specific healthcare experiences.

Patient categories

Currently, there are nine patient categories included in the VHES. Five of these are continuous surveys, sent monthly to a sample of eligible patients who had a hospital or emergency department experience in the previous month, and asking them to reflect on that specific experience, and four are annual surveys.

Continuous surveys are:

1. Adult inpatients aged 16 or over who were admitted to one of 116 hospitals.
2. Paediatric inpatients aged 15 or under who were admitted to one of 34 hospitals. For those aged under eight, the survey is directed to the parent or carer, while the 8-15 year-olds' questionnaire has questions for the parent or carer to complete, the child to complete and both to complete together.
3. Adult emergency patients aged 16 or over who attended one of 39 emergency departments but were not admitted to hospital.
4. Paediatric emergency patients aged 16 or under who attended one of 39 emergency departments but were not admitted to hospital, aged 15 or under who were admitted to one of 34 hospitals. For those aged under eight, the survey is directed to the parent or carer, while the 8-15 year-olds' questionnaire has questions for the parent or carer to complete, the child to complete and both to complete together.
5. Maternity consumers who received services from Victorian public hospital services in relation to antenatal, labour and birth and postnatal care at one of 42 hospitals.

Annual surveys are:

1. Adult specialist clinics patients who had an outpatient appointment at one of 47 hospitals.
2. Paediatric specialist clinics patients who had an outpatient appointment at one of 10 hospitals.
3. Community health services who used one of 88 community health services.
4. Planned and emergency ambulance service users

Questionnaires can be viewed by clicking on the download symbol next to each patient category name in the results view.

Sampling and data collection

All patient categories use the same basic method of data collection, with the exception of community health which uses a different methodology designed to meet the unique needs of this population – explained further below.

Data collection – excluding community health

For all inpatient, emergency, maternity, specialist clinic and ambulance surveys, sample is provided monthly by each campus and by Ambulance Victoria (AV) from patient files. Campuses and AV are required to provide limited details (name, patient category, preferred language, date of birth, postal address and where possible, email address) for a defined number of randomly selected patients each month via a secure portal. These details are kept for six months to ensure that patients are not surveyed too frequently and then securely destroyed to preserve anonymity.

Patients for whom an email address is provided are then emailed a link to the online version of the questionnaire. If they do not complete the survey online within two business days, they are then posted a hard copy version of the questionnaire. Those patients for whom an email address is not provided are also posted a hard copy survey at this point. Patients who receive a survey in a language other than English will only have the option to complete this survey in hard copy. A questionnaire is sent to a patient in a language other than English if a patient's preferred language, as identified in the data provided by campuses, matches one of the languages available in the VHES.

Those who receive a mail-out survey are also given details to complete the survey online if they prefer, or to complete the hard copy version and return by reply paid envelope. All mail-out surveys are data entered, and the data is merged with online results. At this point, the unique patient IDs are checked to ensure no patients have attempted to complete online and hard copy versions of the survey.

Data-collection – community health

As noted above, a very different methodology is used for community health. Rather than surveys being mailed to the patient address, community health service clients are invited to participate, in person while using the service itself. This protects the anonymity of clients, addresses the absence of a consistent state-wide database of client details, and increases the opportunity for homeless or transitory clients and those with low-literacy to participate.

For each survey site, a unique survey pack is provided with the allocated number of English and other language surveys, based on estimates of monthly client appointments and language preferences provided by services.

Sites are instructed to offer the survey to each eligible client using the service (including taking services on home visits) until the survey allocation is depleted, or the fieldwork period ends.

Community service clients who agree to the survey have the opportunity to complete it in hard copy and mail by reply-paid envelope or online. In addition, community health services are encouraged to assist clients to complete the survey by providing pads, computers and where possible, volunteer assistance within the service.

Languages

Adult Inpatient, Adult Emergency and Adult Specialist surveys are offered in the following 15 languages, in addition to English:

Arabic

Croatian

Greek

Hindi

Italian

Macedonian

Maltese

Polish

Russian

Serbian

Simplified Chinese

Spanish

Traditional Chinese

Turkish

Vietnamese

Paediatric Inpatient, Paediatric Emergency, Maternity and Specialist Paediatric surveys are offered in the following 6 languages, in addition to English:

Arabic

Hindi

Simplified Chinese

Turkish

Traditional Chinese

Vietnamese

Community health surveys are offered in the following 15 languages, in addition to English:

Arabic

Burmese

Chin Hakha (from Burma, India, Bangladesh)

Dari

Farsi
Greek
Italian
Karen
Russian
Simplified Chinese
Somali
Tamil
Traditional Chinese
Turkish
Vietnamese.

These languages were selected based on the top languages spoken by patients in Victoria's public health systems. In 2017, the ambulance survey was provided in English only, as limited information on the preferred language of patients was available.

Weighting and significance testing – all patient categories

To ensure that data accurately represents the population of interest (the true population of patients at each campus), 'normalising factors' are applied to the data. Normalising factors are calculated based on the difference between the proportion of a certain type of respondent in the sample and the proportion of that type of respondent attending the health service. In essence, applying normalising factors to a dataset readjusts the achieved sample to resemble the population, removing any skew in the results. The calculation of proportional factors to normalise survey data is a standard research process.

For adult inpatient, emergency and specialist clinics categories, a proportional weighting scheme is applied to the sample at each campus to bring it into line with each campus's true population by age and gender. This is based on the average annual separation data for each campus in 2013 and applies to all adult inpatient, emergency and specialist clinics results. This means, for example, that older people aren't over-represented in the survey results by virtue of older people being more likely to complete the survey than younger people. No age or gender weighting is applied to paediatric, maternity or community health results.

When looking at results that reflect a group of campuses (for example, at health service, state or peer group level) each campus is normalised according to what percentage of the group's true population it represents. This means, for example, that one hospital isn't underrepresented because its patients were less likely to complete the survey than those at another hospital. This level of normalisation occurs for **all patient categories**.

While weighting is applied to make a sample more accurate, any data manipulation can introduce error. Ipsos accounts for this by using an effective error margin – a process that estimates the degree of error introduced into a sample by a weighting scheme and accounts for it in all statistical tests applied.

Reporting

Results for the inpatient, maternity and emergency surveys are reported on a quarterly basis on this reporting portal, three months following the completion of each quarter. Specialist clinics surveys are reported once annually in September/October based on data collected among April-June patients and community health service results are reported in March/April based on data collected in October-December.

Quarters are:

January to March stays (referred to as 'M' in charts throughout the portal) – results made available in the middle of the following June

April to June stays (referred to as 'J' in charts throughout the portal) – results made available in the middle of the following September

July to September stays (referred to as 'S' in charts throughout the portal) – results made available in the middle of the following December

October to December stays (referred to as 'D' in charts throughout the portal) – results made available in the middle of the following March.

For all categories excluding community health, results for each campus or health service are published on the portal only if the campus achieves at least 42 survey returns to ensure the data is statistically robust. However, these campuses will still contribute to the peer group, health service and state average. Where a campus does not achieve 42 survey returns, the portal will state that there is insufficient data for this period.

However, for **continuous surveys campuses** with only small numbers of completed questionnaires will receive a rolling sample as the survey progresses. This means that results for multiple quarters will be merged to provide a sufficient sample size over a longer period.

Note that a sample size of 42 affords a maximum margin of error of +/- 15% at the 95% level of confidence. This means that if 70% of patients at campus with 42 survey completes rate their overall experience as 'very good' or 'good', we can be 95% confident that between 55% and 85% of all patients actually feel this way. As the sample size increases, the margin of error decreases. For example, if 70% of a sample of 150 patients rate their experience as 'very good' or 'good', we can be 95% confident that between 78% and 62% actually feel this way, as the maximum margin of error is +/- 8%.

Provided a campus or health service (or district or region in the case of ambulance surveys) receives at least 42 survey returns overall, all individual questions will be presented, regardless of how many people answered that question. Some questions (such as those directed at people who need help understanding English) are asked only of a small subsection.

Community health services and sites are often much smaller than hospitals. As such, they are published on the portal only if the campus achieves at least 30 survey returns to ensure the data is statistically robust. However, these campuses will still contribute to the peer group, health service and state average. Where a campus does not achieve 30 survey returns, the portal will state that there is insufficient data for this period.

Note that a sample size of 30 affords a maximum margin of error of +/- 18% at the 95% level of confidence. This means that if 70% of patients at campus with 30 survey completes rate their overall experience as 'very good' or 'good', we can be 95% confident that between 52% and 88% of all patients actually feel this way.

Provided community health site or health service (or district or region in the case of ambulance surveys) receives at least 30 survey returns overall, all individual questions will be presented, regardless of how many people answered that question. Some questions (such as those directed at people who need help understanding English) are asked only of a small subsection.

Analysis

Throughout this portal, statistically relevant significant findings have been reported at the 95% confidence interval and are represented within tables in green where the subject (campus, health service or state) has performed significantly higher than the comparator or in orange where it has performed significantly lower.

In addition, a key driver analysis was run to determine the 'Key Aspects of Care' for each patient category. These Key Aspects of Care are the defining hospital experiences: those that are most likely to separate a patient who rated their overall experience as 'very good' or 'good', from those who rate it as 'poor' or 'very poor'.

Response rates

In the April - June 2017 period, the following statewide response rates were achieved for each patient category:

- **Adult Inpatient:** 7086 individuals, or 31% of those invited completed the survey
- **Adult Emergency:** 2399 individuals, or 18% of those invited completed the survey
- **Paediatric Inpatient:** 1276 individuals, or 19% of those invited completed the survey
- **Paediatric Emergency:** 1538 individuals, or 15% of those invited completed the survey
- **Maternity:** 1502 individuals, or 28% of those invited completed the survey
- **Paediatric Specialist Clinics:** No surveying was conducted during the April - June 2017 period
- **Adult Specialist Clinics:** No surveying was conducted during the April - June 2017 period
- **Community Health:** No surveying was conducted during the April - June 2017 period

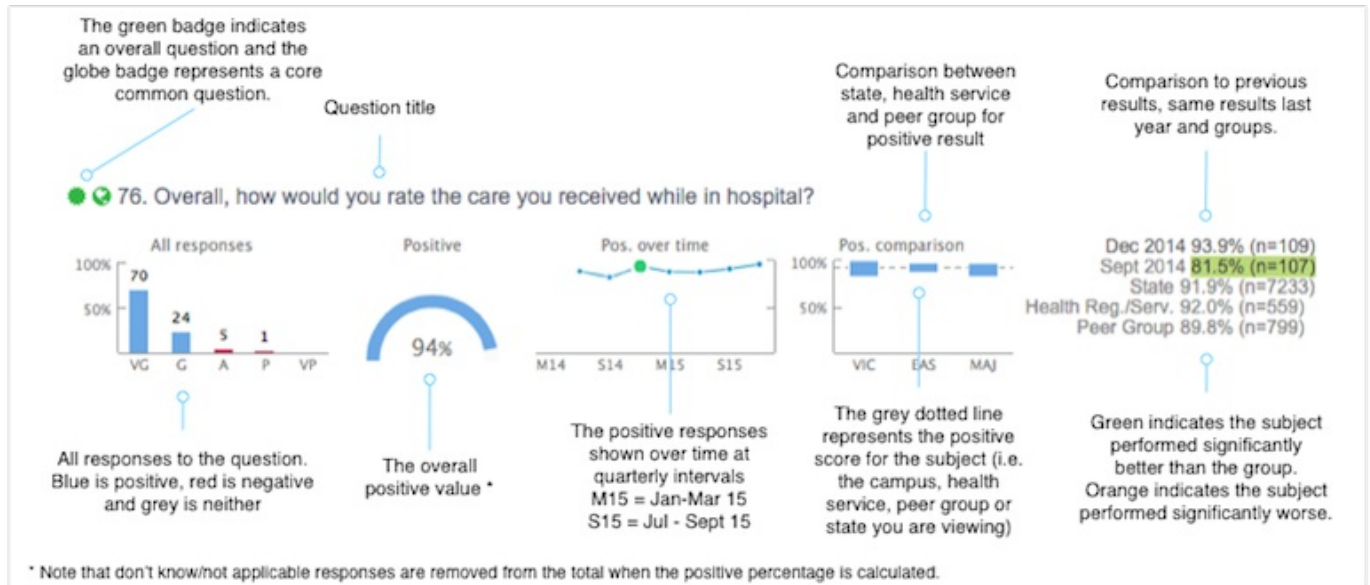

Help

Answers to frequently asked questions are presented below. If these do not respond to your query, please contact us at results@vhes.com.au

Frequently asked questions

Q: How do I interpret each question chart?

A: The images below provide detailed information on how to interpret and navigate charts and data.

Q: How frequently are results provided?

A: Results for the survey are reported on a quarterly basis, three months following the completion of each quarter. Quarters are:

- January to March stays (referred to as M in charts throughout the portal) results made available at the beginning of the following June
- April to June stays (referred to as J in charts throughout the portal) results made available at the beginning of the following September
- July to September stays (referred to as S in charts throughout the portal) results made available at the beginning of the following December
- October to December stays (referred to as D in charts throughout the portal) results made available at the beginning of the following March.

Q: Why can't I see results for certain patient categories for my campus?

A: Results for each campus are provided only if the campus achieves at least 42 survey returns to ensure the data is statistically robust (please see the Method section in Appendix 2 for more information on this). Where a campus does not achieve 42 survey returns, the portal will state that there is insufficient data for this period. Many health services experienced initial difficulties with data extraction and uploading. Most services have resolved these difficulties with and should expect results for all categories for the July- September results.

However, campuses with only small numbers of completed questionnaires will have the opportunity to receive a rolling sample as the survey progresses. This means that results for multiple quarters will be merged to provide a sufficient sample size over a longer period.

Q: What does the alert symbol ⚠ mean?

A: An alert symbol is shown where the sample size for a particular question is less than 30. This means that the margin of error for this question is quite large (more than +/- 18%), so results should be interpreted with caution.

Q: How can I see the patient comments?

A: Patient comments are analysed and presented at an aggregate level under the 'other comments' tab for each patient category. These comments are also provided, verbatim, to campuses.

The Victorian Healthcare Experience Survey operates under the Information Privacy Act 2000 (Vic) (IPA). The IPA requires Victorian State and local government agencies to collect and handle personal information in accordance with ten enforceable privacy principles.
