Click here:

<https://welearn.wh.org.au/course/view.php?id=249>

Or follow the prompts below:

**Courses Catalogue > Clinical Staff (Non-Mandatory) > Scroll down to Wound Care**

### TRAINING MODULES AVAILABLE ON WESTERN HEALTH WELEARN!

#### Pressure Injury Prevention:

Pressure injuries are recognised worldwide as one of the top causes of harm to patients. Western Health is committed to implementing a multifaceted organisational pressure injury prevention strategy that will enable all staff to work towards achieving zero hospital acquired pressure injuries.

The modules in this course provide easy to access evidence-based resources for clinical staff. The objective is to provide clinical staff with the skills to deliver consistent care for all patients across the network thereby improving patient outcomes.

#### Wound Care:

This course provides information and resources related to Wound Care. There are links to external resources and learning packages as well as downloadable pdfs on various topics.

*These modules contribute towards your annual CPD points.*
