

Nuclear Medicine

Western Health Medical Imaging provides a comprehensive range of diagnostic Nuclear Medicine services, utilising up-to-date equipment to obtain valuable functional information.

Our range of services include:

- Myocardial perfusion imaging/MIBI stress tests
- Bone scanning with SPECT
- Diagnosis and treatment of hyperthyroidism
- Renal imaging
- Oncologic imaging
- Parathyroid imaging
- Gastrointestinal imaging

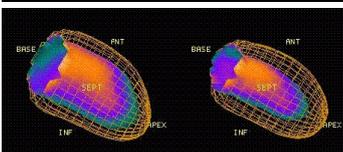

We offer SPECT/CT imaging for enhanced image quality and anatomical localisation.

The department is staffed by highly competent medical and technical staff, providing an efficient and professional service with exceptional patient care.

Western Health Medical Imaging can offer next day appointments with prompt delivery of high quality reports to assist in patient management.

WHMI facilities are licensed under the Medicare agreement and will provide Bulk Billing (with no out of pockets expense) to all patients with a referral that complies with Medicare requirements.
