

Fractures from osteoporosis are  
**more common** than  
**HEART ATTACK | STROKE | BREAST CANCER**  
combined.

Make the **FIRST** break the **LAST**  
with  
**FRACTURE LIAISON SERVICES**

## You are invited to our **AIMSS Seminar Series** combined with the launching of our **Fracture Liaison Service at Western Health**

**Guest Speaker: Dr. Paul Mitchell, BSc (Hons), C.Chem, MRSC**

**Member of the ANZ Hip Fracture Registry Steering Group  
Chairman of the Board of Trustees of Osteoporosis NZ**

Paul has spent the last 15 years working on programs to improve fragility fracture care and prevention throughout the world. Paul has published extensively on implementation of Fracture Liaison Services and was author of the 2012 International Osteoporosis Foundation World Osteoporosis Day Report on the "Capture the Fracture" Campaign.

### Program
