

Prostate Cancer Specialist Nurses

Providing care and support to those
affected by prostate cancer.

WHAT WE DO

Prostate Cancer Foundation of Australia supports a team of Prostate Cancer Specialist Nurses located in a range of health care settings across Australia.

A diagnosis of prostate cancer can be a very stressful time for men and their families and friends.

Our prostate cancer specialist nurses can help you and your family by:

- Providing you with reliable information about your diagnosis and your treatment options
- Providing information, care and support to help manage the side effects of treatment
- Helping you access services at your hospital and in your community
- Helping you access a support group.

Our prostate cancer specialist nurses can be contacted by you at any stage during or after treatment. It does not matter how many years have passed since you received your treatment.
